

Katrin Hybrid System towel roll dispenser with sensor function

84739

- A functional and reliable towel roll dispenser system with sensor functionality in an attractive design; available in white and black.
- Economical and hygienic to use thanks to its controlled, contactless dispensing of individual sheets.
- Comprehensive, flexible configuration options allow you to easily adjust it to individual needs:
 - - Paper length: S, M, L – tailored to the required capacity
 - - Paper feed: Automatic or upon request ("hidden sheet")
 - - Time delay: 3 pause intervals for feeding the next sheet
 - - Sensor sensitivity: 3 levels adapted to spatial conditions
- Particularly suitable for washrooms with medium to high traffic levels.
- Easily monitor the paper fill level through the transparent sides.
- Closing function on both sides of the dispenser for greater flexibility when opening.
- Suitable for Katrin System's comprehensive assortment of towel rolls in various qualities and capacities.
- Battery operation with very low energy consumption. 4 x LR20 1.5 V batteries (not included) are required. Do not use any rechargeable batteries.
- The Katrin Hybrid System towel roll dispenser also remains functional if the batteries are empty, ensuring operation until the batteries are replaced.
- The plastic parts are made of ABS (acrylonitrile butadiene styrene) and PC (polycarbonate) for a long service life in demanding environments. Katrin dispensers are robust, long-lasting and can be recycled at the end of their service life.
- Katrin dispensers meet UL94 fire protection regulations (EU).
